Retractable Gear Attachment Systems

First engineered for SCUBA diving, the Gear Keeper is a rugged, retractable gear attachment system, designed to utilize and protect gear in **severe environments with maximum break strength and durability.**

The Gear Keeper is at the core of an extensive product line that boasts an impressive array of benefits and features: a **patented flushing system** that clears sand and debris from the unit, is **salt-water proof**, and will withstand **high-temperature** environments; a **patented Q/C Connector System** that provides quick and easy connection/disconnection of gear.

The **RT3 series** features **80# (36 Kg) break-strength** and Nylon/Kevlar line. The **RT2 series** features **60# (27 Kg) break-strength**. The **New RT4 series** features **60# (27 Kg) break-strength**, an optional high-tensile nylon line for maximum break strength and durability under the high line flexing conditions seen in key applications.

Gear Keeper's patented **360-degree Rotating Belt Clip** allows the retractor to rotate during use, reducing tension and line wear.

The **Stainless Steel belt clip** is built tough to survive severe and moist environments. In addition, the exclusive **interlock feature** prevents the Gear Keeper from becoming dislodged while attached yet allows easy removal.

Combined, all these features make this one tough key retractor.

The **Standard Belt Clip** fits belts up to 2" (5,1 cm). The **Extended Belt Clip** model fits Duty belts up to 2¼" (5,7 cm).

The **RT3 series** is also available with a **Clamp-on Belt Clip** (fits up to 2¼" (5,7 cm) belts) for high security, i.e. prison guards.

Law Enforcement Gear Keeper packages target applications ranging from Lapel Mic Keepers, Side Arm Tethers and specialized Key holder applications.
