Retractable Gear Attachment Systems

First engineered for SCUBA diving, the Gear Keeper is a rugged, retractable gear attachment system, designed to utilize and protect gear in **severe environments with maximum break strength and durability.**

The Gear Keeper is at the core of an extensive product line that boasts an impressive array of benefits and features. A **patented flushing system** that clears sand and debris from the unit, and is **salt-water proof**. A **patented Q/C Connector System** that provides quick and easy connection/disconnection of gear.

The **RT2 Series** features **60# (27 Kg) break-strength**, stainless steel nylon coated cable and a high impact housing. The **RT3 Series** features **80# (36 Kg) break strength**, Nylon/Kevlar line, and a high-impact housing. Both are available in multiple retraction forces and mounting options for any gear you need to keep handy and can't afford to lose (GPS units, Radios, Flashlights, Tools).

Retractable Side Arm Tethers provide a **low-profile lanyard** to prevent snagging while allowing full mobility. Additionally the defined **break-away point** provides safety should entanglement occur.

The **RT2 Series Low Force** has virtually no tension on the Side Arm. Sidearm will hit the ground if dropped, but remains securely tethered. Preferred when the Side Arm will be carried for long periods (Standard Issue for Navy SEALs)

RT3 Series Super Force will prevent the Side Arm from hitting the ground if dropped while also providing a stabilization force while aiming. Preferred by users who want to prevent their firearm from hitting the ground (ie, helicopter crews, motorcycle police).

Q/C-II Connector System allows easy connection/disconnection of the firearm.

Grab your gear, use it, let it go — it retracts back every time!

Gear Keeper makes whatever you're doing easier while preventing loss or damage to your valuable gear.

▶ Gear Tethers

The perfect solution for tethering your gear in order to allow full gear use while preventing loss. Select appropriate force based on gear weight to retract and hold gear.

Q/C Connector (€ 19,99)

Note: Lower force models may be used as a safety tether for heavier items. In this case, Gear Keeper will only prevent loss but will not retract item. Ideal when high retraction force would hinder use of gear.
