

Cell Phone Security Tether

← Rotates 360° →

Protects against loss & damage Tethers cell phones & PDAs while in use Industrial durability and quality

First engineered for SCUBA diving and now used by Firefighters, Police, Military, Truckers and Industrial users, the Gear Keeper® is a rugged, retractable gear attachment system, designed to utilize and protect gear in **severe environments with maximum break strength and durability.**

The Gear Keeper is at the core of an extensive product line that boasts an impressive array of benefits, features and supreme durability. Unique user features include a **patented Q/C Connector System** that provides quick and easy connection/disconnection of gear and a **patented Rotating Belt Clip** that allows the Gear Keeper to rotate in the direction of use, reducing line wear and resistance.

What does this mean for the user? The Gear Keeper® is a **well-engineered device that will hold up to the kind of repetitive daily use of today's cell phone and PDA users.**

The **New** Gear Keeper cell phone tether incorporates the exclusive **Ratcheting Gear Lock®** that eliminates retraction force on the Cell Phone or PDA — so the Cell Phone or PDA is safely tethered with no annoying tension on the device during use.

The Gear Keeper® securely attaches to a belt, pants or purse next to the cell phone holder and eliminates the worry and hassles involved with dropping or losing the device.

- **Ratcheting Gear Lock** allows phone or PDA to be extended during use with no tension. A simple pull allows Gear Keeper line to retract. Ideal for longer calls and for PDA use

- The retractor securely mounts next to the phone on your belt, pants or purse. Tether retracts neatly out of the way when not in use. (Not intended to retract phone)

Grab your gear, use it, let it go — it retracts back every time!

Gear Keeper makes whatever you're doing easier and prevents loss or damage to your valuable gear

**RT4-5450
Ratcheting Gear Lock Model**
6 oz. (170 gr) Retraction
28" (71 cm) Extension
