## Retractable Gear Attachment Systems

First engineered for SCUBA diving, the Gear Keeper is a rugged, retractable gear attachment system, designed to utilize and protect gear in **severe environments with maximum break strength and durability.**

The Gear Keeper is at the core of an extensive product line that boasts an impressive array of benefits and features. A **patented flushing system** that clears sand and debris from the unit, and is **salt-water proof.** A **patented Q/C Connector System** that provides quick and easy connection/disconnection of gear.

The RT2 Series features **60# (27 Kg) break strength,** stainless steel nylon-coated cable and a high-impact housing. It's available in multiple retraction forces and mounting options.

**Speciality product packages** combine the proper retraction force, attachment accessories and mounting options for specific applications (ie; Dog Training Transmitters, GPS units, Range Finders, FRS Radios, and Duck Calls). Or you can choose whatever force, mounting option, and end type to create your own combination (Refer to RT2/RT3/RT4 Product Pages)

Other speciality products include the **Tangle-Proof Duck Call Lanyard.** This innovative design is the ideal way to hold your calls—separates calls to eliminate tangling, noise and allows calls to be easily located without looking.

The **Side Release Call Adaptors** provide the ability to change out calls and customize the lanyard easily and quickly.

**Grab your gear, use it, let it go — it retracts back every time!**

Gear Keeper makes whatever you're doing easier while preventing loss or damage to your valuable gear.

■ Heavy Duty Snap Clip

Also available in:

- Threaded Stud Mount
- Velcro Strap
- Rotating Belt Clip

■ High-Impact Case

■ Multi-Force Options

- 3 oz (85 gr)
