Retractable Gear Attachment Systems

First engineered for SCUBA diving, the Gear Keeper is a rugged, retractable gear attachment system, designed to utilize and protect gear in **severe environments with maximum break strength and durability.**

The Gear Keeper is at the core of an extensive product line that boasts an impressive array of benefits and features: a **patented flushing system** that clears sand and debris from the unit, is **salt-water proof**, and will withstand **high-temperature** environments.

The **RT3 series** features **80# (36 Kg) break strength** and uses **Nylon/Kevlar line.** The **RT2 series** features **60# (27 Kg) break strength** and uses **high-flex Nylon Coated Stainless Steel cable.** Both series feature a high-impact housing, multiple spring forces and multiple mounting options.

The exclusive **Q/C (Quick Connect) System** allows instruments to be easily disconnected from the retractor, minimizing the tethering length (gear to retractor).

The **Instrumentation** line includes products to meet every user's needs—clipping to a belt, web belt solid mount setups, and shoulder straps with retracting devices.

The **Rotating Belt Clip System** provides a secure belt mount that allows the Gear Keeper® to **rotate a full 360°**, reducing cable wear and adding function.

The **New Multi-Mount Clamp-On belt clip** features:

- A **360-degree Clamp-On belt clip** for the ultimate in durability and security.
- A **Dual-Axis Rotation Clamp-On belt clip** that offers a low-profile, compact mounting system that permits 360° rotation on the belt as well as 180° swing-away from the body (*see back for more details*). This ultimate-pivot feature provides the most flexible use with the least possible cable wear.

Gear Keeper® Shoulder Straps offer a comfortable strap system with the exclusive **Gear Slide feature** — the device can move on the strap without the strap moving on your body. The exclusive **Q/C-II connector system** allows instruments to be connected to either a Gear Keeper® Retractor or Shoulder Strap without changing the attachment mechanism.

The **Shoulder Strap / Retractor combo** offers a shoulder strap attachment system with the added flexibility of a Retractor, allowing the instrument or device to be extended away from your body during use.

■ Rotating Belt Clip Mount

Also Available in:
Clamp-On Rotating
Clamp-On 2-Axis
Snap Clip

■ Interlock Belt Clip

■ Available in
8 Force Options

■ Nylon Line w/ Kevlar Core

■ High-Impact
Case

■ Quick Connect-II (Q/C-II)
